

**TODAY:** Introduction to Elimination

1. **Elimination test**
2. **4 Part B questions (Mock test)**
3. **Analyse answers**

## ELIMINATION TEST

What is elimination?

2. What does this policy statement say about use of clinical images?

- Medical research is the most usual primary purpose for images.
- Patients are consulted in relation to the primary purpose of images.
- Images intended for training purposes don't require patient consent.

There are 4 ways that we usually eliminate:

1. Not given: not in the text
2. Partially true: not 100% true
3. Doesn't answer the question
4. Opposite idea is in the text

**Game: 3 questions**

**Don't tell me the answer**

You must tell EXACTLY why each wrong option is not correct.

Question	Text
<p>What do patient's like about the new home care measures?</p> <p>A. It is easier for them</p> <p>× B. They enjoy new things</p> <p>× C. It is more less convenient opposite: you can be very sure</p> <p style="color: red; font-size: small;">NG Mentioned but not given</p>	<p>It is well known that all the patients enjoy the new home care measure for the reason that it is very convenient, and they can spend more time with their family</p>

Question	Text
<p>What do patient's like about the new home care measures?</p> <p>A. It is easier for them</p> <p>B. They enjoy new things</p> <p>C. It is more less convenient</p>	<p>It is well known that all the patients enjoy the new home care measure for the reason that it is very convenient, and they can spend more time with their family</p>

Question	Text
<p>What does the new research suggest about alcohol?</p> <p>A. It is healthy to drink daily</p> <p>B. Red wine is tasty</p> <p>C. Families should encourage children</p> <p>D. Moderate consumption may be okay.</p> <p style="color: red; font-size: small;">Partially true</p> <p style="color: red; font-size: small;">Mentioned but NG</p> <p style="color: red; font-size: small;">NG</p>	<p>New research suggests that alcohol consumption can be healthy if consumed in appropriate quantities every day. A small glass of red wine consumed at meal time scientists have concluded is not necessarily detrimental.</p> <p style="color: red; font-size: small;">Vocab: harmful</p>

SEQUENCE LANGUAGE

Also, when the question asks only about the beginning or the end:

***Initially***, the doctor recommends / ***At the end***, the advice is...

*First operation*, / *In middle of the treatment*,

<p><b><i>At the start</i></b>, the patient did not</p> <p>A. Say he used ear buds</p>	<p><b><i>Initially</i></b>, the patient said that he did not use ear buds. But later on, he did.</p>
