

1. What is Paragraph Function?

First, you need to crack about 3 eggs into a bowl. Next, you should mix them together using a fork. After this, you need a frying pan. Place oil in the pan and heat it for one or two minutes on a medium heat. When the pan is hot enough, slowly pour the eggs...

Tomorrow:			
Eggs Bread Fish Apples Pears Bananas Sardines Toilet paper			

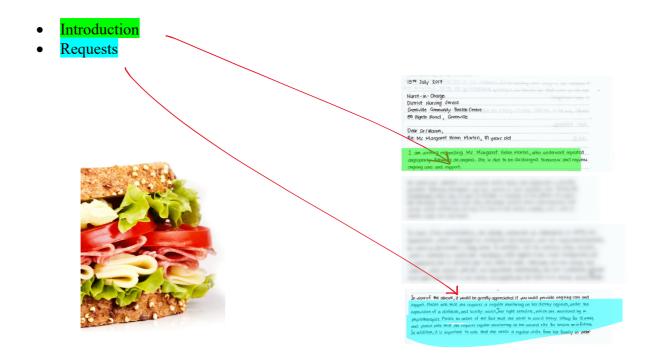

It was a dark and stormy night ten years ago. the winds blew hard, and the rain crashed against the windows of the old house. Suddenly, there was a loud knock at the door. The children looked at each other with fear in their eyes as their father began to stand.

OET EXAMPLE (REAL)

Following his operation, Mr Baker experienced disorientation, which was probably due to his anaesthesia, but no signs of dementia were observed. Please ensure that he is monitored regarding this for the next 2 weeks. One week after the operation, Mr Baker had a blood transfusion because his haemoglobin level dropped post-surgery. Currently, he is recovering well.

What are the 2 most important paragraph functions?

The Purpose in the Introduction (care & support, assessment, monitoring, etc.) Must be developed in the letter (usually in the Requests paragraph)
