

TODAY: Part C Reading

- 1 Format
- 2 Lexical & Reference
- 3 Practice

QUESTION STYLE TYPES:

4 types of questions:

1. Reference question
2. Lexical question
3. Normal questions: **What does the writer think?**
4. Statement questions: **The research highlights**

<p>Normal:</p> <p>18. What point does the writer make in the fourth paragraph?</p> <ul style="list-style-type: none"> (A) The way a treatment is presented is significant even if it is a placebo. (B) The method by which a drug is administered is more important than its content. (C) The theatrical side of medicine should not be allowed to detract from the science. (D) The outcome of a placebo treatment is affected by whether the doctor believes in it. 	<p>Official:</p> <ol style="list-style-type: none"> 1 Read the question stem 2 simplify the question: remove unnecessary words 3 Read & think about Q 4 Eliminate 5 Choose
<p>Statement:</p> <p>9. In the second paragraph, extinction learning is explained as a process which _____</p> <ul style="list-style-type: none"> (A) makes use of an innate function of the brain. (B) encourages patients to analyse their particular fears. (C) shows patients how to react when having a panic attack. (D) focuses on a previously little-understood part of the brain. 	<p>Official:</p> <ol style="list-style-type: none"> 1 Read the question stem 2 simplify the question: remove words & add 'What' at end 3 Read & think about Q 4 Eliminate 5 Choose
<p>Lexical:</p> <p>8. In the second paragraph, the writer uses the phrase 'dark side' to reinforce the idea that</p> <ul style="list-style-type: none"> (A) memories of agreeable events tend to be inaccurate. (B) positive memories can be negatively distorted over time. (C) unhappy memories are often more detailed than happy ones. (D) unpleasant memories are aroused in response to certain prompts. <p>The brain's extraordinary ability to store new memories and forge associations is so well celebrated that its <u>dark side</u> is often disregarded. A feeling of contentment is easily evoked</p>	<ol style="list-style-type: none"> 1. Read the stem 2. Look for <u>clues</u> in sentence that give meaning <p>Example:</p> <p>She never <u>bought</u> and <u>new clothes</u> and that's why she is <u>ghhghghgh</u></p>
<p>Reference:</p> <p>10. What does the phrase 'for that same reason' refer to?</p> <ul style="list-style-type: none"> (A) the anxiety that patients feel during therapy (B) complaints from patients who feel unsupported (C) the conflicting ethical concerns of neuroscientists (D) psychotherapists who take on unsuitable patients <p>fear is more complicated. Each exposure trial will involve a certain degree of distress in the patient, and although the process is carefully managed throughout to limit this, some psychotherapists have concluded that the treatment is unethical. Neuroscientists have been looking for new ways to speed up extinction learning <u>for that same reason</u>.</p> <p>There is a word before or after that is replaced by</p>	<ol style="list-style-type: none"> 1. Read the stem 2. Look for <u>clues</u> for that the what is replaced <p>I bought a car and an apple. <u>It</u> was nice and clean</p>
