What is a suffix?

End of a word:

-able

-ive

-ed = verb & adject

'bored'

PASSIVE:

She was + V3 + by

TEST: fill in the blanks using the vocab

Mr Green's symptoms, including fever and cough, are **associated with** an underlying respiratory infection. As an elderly individual, he is more **susceptible to** complications from viral illnesses due to a weakened immune system, making him particularly **vulnerable to** respiratory infections. He was recently exposed to someone with the flu, putting him **at risk of** contracting the virus himself. There is some concern **about his** condition and closely monitoring his respiratory status. A clean and quiet hospital environment is **conducive to** his recovery and overall well-being. He has been **tolerant of** the prescribed antibiotics, and his fever has improved, indicating that he is **responsive to** treatment. However, precautions must be taken or he could be **subject to** difficulties as his condition progresses.
