Introduction	<p>Ms Barbara Keller Manager Green Acres Care Home 200 Green Street, Newtown</p> <p>4th July 2020</p> <p>Dear Ms Keller,</p> <p>Re: Mr John Beattie, DOB: 23rd March 1930</p> <p>I am writing regarding Mr Beattie, who was admitted to our hospital after a fall. He is scheduled to be discharged today and requires ongoing care.</p>
Timeline: Story	<p>On 1st July, Mr Beattie was admitted to our hospital with minor bruising on his left hip and arm and a laceration above his left eye after a fall. Additionally, his hip and arm fractures were ruled out, and no sutures were required. Despite recovering well, Mr Beattie acknowledged losing his confidence in living alone, and as a result of the discussion with his sons, Mr Beattie has agreed to be transferred to your care home.</p>
Background:	<p>Social Background: Labourer (retired) Widowed (wife died 2 yrs ago), now lives alone 2 sons: Bob, 46 y.o. – lives 500 km away, w 2 children Sean, 42 y.o. – divorced, lives 10 km away, has M.S. (walks w cane – wheelchair used sometimes)</p> <p>Interests: watching sport on TV (partic. football)</p> <p>Allergies: Peanuts</p> <p>Family History: Nil</p> <p>Past medical history: 1982: hypertension 2008: osteoarthritis R hip 2010: osteoarthritis both knees 2015: coronary artery disease (CAD)</p> <p>Current medications: Enalapril 1x/day (hypertension) Paracetamol 2x/day (osteoarthritis) ACE inhibitor (benazepril) 30 mg/day (CAD) ✓</p> <p style="text-align: right; color: purple; font-weight: bold;">SUMMARISE / REMOVE</p>

Socially, he is a retired labourer, lives alone, and has an allergy to peanuts.</p>

Regarding Mr Beattie's risk factors ,he has hypertension, osteoarthritis in his right hip and his knees ,as well as coronary artery disease. His current medications are :enalapril once aday; paracetamol twice a day,and penazepril 30 mg daily. He receives assistance from a care giver three times a week and a cleaner once a week. Additionally,he enjoys watching sport on television.

Socially, Mr Beattie lives alone and had been visiting by care giver to help with ADLs. His hobby is watching sport on television. Please note that Mr Beattie is allergic to peanuts.

Mr Beattie lives alone and likes watching football on TV. He has peanut allergies. He has hypertension, osteoarthritis on his right hip and both knees and coronary heart disease. Therefore, he is currently taking enalapril, once per day, paracetamol, twice per day and benazepril, 30 mg, once a day.

Regarding Mr Beattie's background, he has hypertension, osteoarthritis in his right hip and his knees, as well as coronary artery disease. His current medications are: enalapril once **a day**; paracetamol twice a day, and penazepril, 30 mg daily. Additionally, he enjoys watching sport on television.

Socially, Mr Beattie lived alone before admission and had been visiting by care giver to help with ADLs. ~~His hobby is~~ He enjoys watching sport on television. Please note that Mr Beattie is allergic to peanuts.

Mr Beattie lives alone and likes watching football on TV. **He has** peanut allergies. **He has** hypertension, osteoarthritis on his right hip and both knees and coronary heart disease. Therefore, he is currently taking enalapril, once per day, paracetamol, twice per day and benazepril, 30 mg, once a day.

Okay in orange the sentence are a bit short and low level sounding... why no join with 'and'?

Mr Beattie was diagnosed with hypertension in 1982 and has been taking enalapril once daily. He has had osteoarthritis since 2008, initially in his right knee, and his both knees were involved in 2010, for which he takes paracetamol twice daily. Mr. Beattie was diagnosed with coronary artery disease in 2015 and has been prescribed benazepril at a dosage of 30mg per day. Please note that he has a peanut allergy.

Due to Mr Beattie's social background, he is a retired widowed and has two sons, he has lived alone and his caregiver use to visited and helped him with his ADLs three times a week. Due to his hobbies, he likes watching particularly football on TV.

Mr Beattie has hypertension takes enalapril once daily. He has had osteoarthritis since 2008, initially in his right knee, and both **his** knees were involved in 2010, for which he takes paracetamol twice daily. Mr. Beattie was diagnosed with coronary artery disease in 2015 and has been prescribed benazepril at a dosage of 30mg per day. Please note that he has a peanut allergy. **Regarding** his hobbies, he likes watching sports, particularly football on TV.

Sometimes it necessary to summarise or removed detail:

- Time limits
- Appropriate details can go in or not go in sometimes
